Purpose The purpose of this funding opportunity is to reduce health disparities through the development and translation of appropriate medical technologies. The NIH defines health disparities as differences in the incidence, prevalence, morbidity, mortality, and burden of diseases and other adverse health outcomes that exist among specific population groups. These population groups i ...

6. <u>075: A Low Molecular Weight Thyroid-Stimulating Hormone Receptor Agonist for Thyroid Cancer (NIH TT)</u>

Release Date: 08-25-2011Open Date: 08-25-2011Due Date: 11-07-2011Close Date: 11-07-2011

NIDDK investigators have discovered and are evaluating the first potent and efficacious small molecule agonist of the thyroid-stimulating hormone (TSH, thyrotropin) receptor (TSHR) that has potential for clinical application in patients with thyroid cancer. This agonist drug is intended for use in patients for 2-5 days at a time following thyroidectomy and at subsequent intervals after in ...

7. 147: A Mobile Application to Help Patients Take their Pill Medications as

Prescribed: Improving Medication Adherence

Release Date: 08-15-2012Open Date: 08-15-2012Due Date: 12-03-2012Close Date: 12-03-2012

It is strongly suggested that proposals adhere to the above budget amounts and project periods. Proposals with budgets exceeding the above amounts and project periods may not be funded. Drugs don't work in patients who don't take them. — C. Everett Koop, M.D, former U.S. Surgeon General Medication adherence is described as the extent to which patients take medications as prescribed by their ...

8. 033: A Mobile Phone Application ("App") for Advancing Teen Pregnancy Prevention

Release Date: 08-15-2012Open Date: 08-15-2012Due Date: 12-03-2012Close Date: 12-03-2012

Background: The teen birth rate in the US remains high, particularly among racial/ethnic minorities compared with many other industrialized nations. The adverse consequences of teen pregnancy are substantial at individual, family, and community levels. A range of innovative tools and interventions is needed to foster an environment that enables teens to experience better reproductive health. In 20 ...

9. X15.01: A New Technique for Automated Analyses of Raw Operational Videos

Release Date: 07-18-2011Open Date: 07-18-2011Due Date: 09-08-2011Close Date: 09-08-2011

Develop a software tool that automatically processes raw motion video footage (from a single conventional 2D camera) of a crew (spacecraft or ground) during a space mission. Such a tool is needed to address vehicle/habitat design issues, as well as crew-to-crew interaction issues, on the ground. For example, unprocessed space mission operational videos down linked from a spacecraft that involve humans as the subjects of interest need to be analyzed on the ground for their motion and behavioral health information. Requirements:

10. X9.01: Ablative Thermal Protection Systems

Release Date: 07-18-2011Open Date: 07-18-2011Due Date: 09-08-2011Close Date: 09-08-2011

The technologies described below support the goal of developing higher performance ablative TPS materials for future Exploration missions. Developments are sought for ablative TPS materials and heat shield systems that exhibit maximum robustness, reliability and survivability while maintaining minimum mass requirements, and are capable of enduring severe combined convective and radiative heating, including: development of acreage (main body, non-leading edge) materials, adhesives, joints, penetrations, and seals. Three classes of materials will be required:
